Education

University of Colorado Boulder, USA August 2016 - Present
Advisor: Michael J. Paul; First year Computer Science PhD student

University of Tokyo, Japan Sep. 2014
M.S. in Information Science and Technology
Advisor: Akiko Aizawa; Thesis: Detecting Upsurge of Emotion Using Characteristic Expressions in Tweets

International Christian University, Japan March 2012
B.A. in Computer Science and Mathematics
Advisor: Grant Pogosyan; Thesis: Fault-Tolerant Packet Routing Algorithms on Hypercube Networks

Experience

Research Assistant, University of Colorado Boulder, USA Aug. 2016 - Present

- Co-PIs: Jordan Boyd-Graber, Michael J. Paul
- Domain-specific multilingual (including low-resource languages e.g., Uyghur, Haitian Creole) term extraction from a general domain corpus using distributional word embeddings and graph-based semi-supervised learning.
- Incorporating a lexical graph built from a pivot language improves the area under the precision curve.

Software Engineer, Amazon/A9.com, Japan Oct. 2014 - Aug. 2016

- Built JA/ZH language detector for search queries with recall > 0.8 .
- Built a semi-supervised CRF-based Japanese query label tagger with $F1 = 0.91$.

Software Engineer Intern, Amazon/A9.com, Japan Nov. 2013 - Feb. 2014

- The first search engineer to intern at Amazon Japan.
- Detected Japanese-English transliteration pairs with $F1 > 0.9$ using EM algorithm.

Part-time Engineer, Atilika, Japan Aug.- Nov. 2013, Apr.- Sep. 2014

- Built a dictionary with over 8000 product names for Japanese named entity extractor.
- Built transliteration generator from English to Japanese. Achieved around 60% in accuracy@1.

Software Engineer Intern, Cookpad, Japan July 2013 (one month)

- Built a recommendation system for related topics on the community site. Accomplished approximately 1.5% of the whole user click rate. Ruby on Rails.

Publications

- Yoshinari Fujinuma, Hikaru Yokono, Pascual Martínez-Gómez, Akiko Aizawa: “Distant-supervised Language Model for Detecting Emotional Upsurge on Twitter”, The 29th Pacific Asia Conference on Language, Information and Computation, Nov. 2015 (Peer-reviewed)

- Yoshinari Fujinuma: “Detecting Japanese-English Transliteration Pairs in Search Query and Clickthrough Logs”, Amazon Machine Learning Conference, May 2015 (Peer-reviewed)

Projects	Finite State Transducer (FST) for Kuromoji	2015
	<ul style="list-style-type: none"> • Replaced a double-array trie to an FST to build a dictionary for Kuromoji, a java-based Japanese tokenizer used in Lucene, Solr, and Elastic Search. • Github link: https://github.com/atilika/fst 	
Academic Honors	Dean’s Fellowship (CU Boulder)	2016
	Best Bachelor thesis in CS and Math (Gödel Foundation Prize)	2012
Computer and Language Skills	<u>Languages:</u> Proficient: Python, Java; Intermediate: C++, Pig, Go <u>Software:</u> Git, Vim, L ^A T _E X, MySQL <u>English:</u> TOEFL iBT 101 (2015)
